

# 6.6 LESSON NOTES

---

## DATE & TIME CALCULATIONS

- Calculating the number of days between 2 dates - **DATE\_DIFF()** function

Field Name

Days to ship

---

Formula 

```
1 DATE_DIFF ( Ship Date , Order Date )
```

- New calculated date fields can be created directly in the schema of the data source by duplicating the date field and then changing its granularity
- Other date functions include **WEEKDAY()** which will return the weekday as a number that can be used in other calculations
