10.2 LESSON NOTES

SHARING ASSETS

Reports

- There are 2 tabs
    - Add people - add people using names or email addresses
    - Manage access
- Can either view or edit and view
- In Manage Access you can set level of security of report via link sharing settings

REPORTS

- Publicly shared reports don't require login
- Sharing a report does not grant access to underlying data sources
- Report Editors **will** have access to the fields of the data
- Report Editors **will not** be able to edit the data source

DATA SOURCES

- Google login **required** to view or edit
- Granting access **does not mean** access to underlying data file
- View only means user **can see but not modify** schema
- Only owner can edit data source **connection**
