8.5 LESSON NOTES

REPORT-LEVEL INTERACTIVITY

- Impact whole report
- Currently 8 available
- **Date Range Control**
    - No date field associated
    - Independent from any data source
    - Allows viewer to apply a date range filter
    - Only applies to visualisations that do not already have a custom date range specified
    - Therefore won't work with scorecards that contain comparison date range
- **Filter Control**
    - Filtering using fields other than dates
    - 6 different ways to present this functionality
        - **Dropdown list** - can include metric
        - **Fixed size** - can include metric
        - **Input box** - viewer can type in value to look up values in field
        - **Advance filter** - allows viewer to choose method of search for text they enter
        - **Slider** - can apply a range of values to metrics
        - **Tickbox** - can only be used with Boolean fields
- Can choose which visualisations are affected by filters by grouping them together. Accessed via Arrange menu
- Can set controls at report level which will apply the contol to all pages (appears in same place and cannot be modified for different pages)
