8.4 LESSON NOTES

VISUALISATION-LEVEL INTERACTIVITY

- Added to individual queries
- **Apply filter**
    - Allows you to click on values contained in charts and tables and apply them as filters for other charts from the same data source
    - Activated at the bottom of each query in the Data tab
- **Optional metrics**
    - Can add in additional metrics to the query that can then be selected in View mode on a report and replace the currently displayed metric
    - Accessed via Optional metric button above the chart on the right
    - Can only add up to 10 metrics
    - Not available for pivot tables and scattercharts
- **Metric sliders**
    - Activated in metrics section of Data tab
    - Accessed via button above each chart and opens a slider
    - Allows viewers to select a range of values to filter the chart
- **Sorting data**
    - Activated in the data tab of the query
    - Accessed via button above chart on right
    - Allows viewers apply a descending or ascending sort to the chart on any of the metrics or dimensions in that chart
- **Drill down**
    - Allows viewers to breakdown the dimension used in a query by other dimensions
    - Accessed via up and down arrows above chart on right
    - Can select single values by clicking them or multiple by clicking and dragging (then applying drill down)
